

Data Linkage Research Conversation Series 2013

3.30 to 5.30pm, Friday September 6

Napier G04, The University of Adelaide, North Terrace

This second session of the 2013 series is hosted by the University of Adelaide, and will feature a panel discussion on the use of linked data to conduct policy relevant childhood development research.

SA NT DataLink and the University of Adelaide extend a warm welcome to all researchers and data custodians to join us with **Professor John Lynch**, **Professor Sven Silburn**, **Dr Steve Guthridge**, **Dr Sally Brinkman**, and **Mr David Engelhardt** in a panel discussion addressing the ins and outs of data linkage, its application to childhood development research and their strategies for translating their research findings to policy for measurable quality improvements to the health and educational outcomes of children living in South Australia and the Northern Territory.

This insightful discussion among expert 'doers' in the data linkage scene will be moderated by **Professor Annette Braunack-Mayer**, and is sure to prove relevant to all researchers, data custodians and policy makers interested data linkage research and its potential to impact the health and wellbeing of our population.

Guests are encouraged to stay after the panel discussion for refreshments and an informal networking opportunity.

Please RSVP via email to
